

***STREET LEVEL* INVESTOR MATH DECK**

Core vibe

Audience: smart kids, bored kids, locked-up brothers, anyone who hates textbooks

Level: Khan Academy intro math → no PDEs, no finance jargon

Style: dark background, bright lines, simple shapes, one idea per card

Card style (visuals)

Background: deep charcoal / near-black

Text: off-white, one accent color per concept (blue for growth, red for danger, green for choices, etc.)

Chart:

super simple

one curve or one bar chart

no grid clutter

big labels: “Before”, “After”, “Fast”, “Slow”

Layout:

top: card name

middle: chart

bottom: 1–2 sentences of plain language

Example cards (Khan Academy level)

Card 1: Rate of Change

Chart:

dark background

one line going up slowly vs one line going up steep

Caption:

“Steeper line = faster change.”

“Know what’s speeding up before it hits you.”

Card 2: Compounding

Chart:

bar chart:

Day 1, Day 2, Day 3... bars growing faster and faster

Caption:

“Small gains stacked over time become big gains.”

“Same for mistakes.”

Card 3: Expected Value

Chart:

two paths:

Path A: big win sometimes, big loss often

Path B: small win often, small loss sometimes

Caption:

“Don’t ask: ‘What happens today?’ Ask: ‘What happens on average?’”

Card 4: Optimization

Chart:

pie chart with 3 slices: time, energy, money

Caption:

“You can’t do everything. Best move = best use of what you’ve got.”

Card 5: Sensitivity

Chart:

one slider moving, three small bars changing with it

Caption:

“Change one thing, other things move. Always ask: ‘What else shifts if I do this?’”

Box + deck

Box: matte black, simple white text: “Every card = one way to think better.”

Inside:

no lore, no fluff

just clean cards, each with:

simple chart

simple idea

one real-life example (money, time, trust, choices)
